

Admin Features

Everything an admin can do on Veloce, on top of full scribe and student access.

Scope & access

- Every admin action is scoped to their own university — an admin at one campus cannot see or act on another campus's data
- The highest role tier: an admin automatically has full scribe and student access too

Moderation

- Review flagged or pending notes before they go live
 - Approve or reject, with the scribe notified either way
- Review and resolve user-submitted reports (content issues, refund requests, and more)
- Approve or reject scribe applications
- Approve or reject appeals from scribes or students disputing a moderation decision

User management

- Ban or unban a user account
- Promote a student to scribe, or demote a scribe, outside the normal application flow when needed

Refunds

- Refund any purchase
 - Access is revoked immediately and the buyer is given spendable credit instead of a reversed card charge
 - The platform's own share of that original sale is never touched — only the portion that was going to the scribe is reclaimed
 - A refund is automatically distinguished from a genuine bank chargeback, which is handled separately and doesn't grant the buyer credit
- Every refund is protected against being processed twice by accident (e.g. two admins acting on the same purchase at once)

Finance dashboard

- Total revenue collected, and the platform's actual share of it, computed transaction by transaction rather than as a single estimate
- Total currently owed to scribes as a pool, separate from what's already been paid out

- Credit issued to buyers via refunds, how much of it has been redeemed, and how much is still outstanding

Payouts

- Review scribe withdrawal requests
 - Approve (which triggers a real bank transfer), reject, or manually mark one as paid
- A scribe is emailed a receipt automatically once their payout is confirmed paid

Messages & feedback

- Send messages to users directly from the admin panel
- Review feedback submitted by students and scribes
